Trinket Tales: final production checklist (v7)

Open **admin.shopify.com** in Chrome and turn on "Desktop site" if you're on a phone. It takes about 45 minutes. If a step is already done, tick it and move on.

What's already built into theme v7 (no work needed):

- Home page sections: banner, trust bar, shop-by-category tiles, featured product, product grid, brand story, Instagram-style photo gallery, quick answers.
- About, FAQ and Contact content.
- Delivery dates that switch on the `dropship` tag.
- Free-delivery bar, sticky Add to cart, equal 4:5 photos.
- Left-aligned layout and a hero that shows your banner image whole.
- WhatsApp chat button, plus an "Ask us on WhatsApp" line on product pages.

Tags drive everything. Give products the right tags, and the collections, home tiles and delivery dates fill themselves.

Tag	What it does
`kids-makeup`	goes into **Kids Makeup Gifts**
`bracelets`	goes into **Handmade Bracelets**
`gift-boxes`	goes into **Gift Boxes and Bundles**
`dropship`	product page shows **10–20 working days** (imported). Without it: 3–5 days
