How the four assignments connect

Assignment 1 - Keyword & Niche Research: finds the niche and the words buyers type.

Assignment 2 - Product Hunting: picks the product that fits those words and has a real online supplier.

Assignment 3 - Product Listing: puts that product on our Shopify store using those words.

Assignment 4 - Competitor Analysis & Case Study: studies who else sells it, and feeds the price and positioning back into the listing.

The same product, the same keywords and the same store run through all four parts, so together they make one complete business project.
